~~activating the user interface providing call handling.~~

28. (Cancelled)

29. (Cancelled)

30. (Currently amended) A method according to claim 27~~1~~, wherein each contact has at least one of a telephone number and a URL address field for storing at least one of an associated telephone number and ~~additional URL address information therewith in addition to the e-mail address field,~~ the user interface providing short cut keys ~~call handling~~ being operable to either access a screen for composing an e-mail message, access a screen for composing a text message or connect to the URL address in dependence on a default programming option selected by the user.

Claims 31-43 (Cancelled)

44. (Currently amended) A mobile phone ~~telecommunications device~~ comprising:

a user interface including call handling keys, a scroll key, and soft keys;
a memory; and
a processor coupled to the memory and programmed with computer-executable instructions to perform the steps comprising:

a) accessing a list of contacts stored in the memory of the mobile phone, each of the contacts in the list of contacts having at least one e-mail address field for storing an associated e-mail address and at least one telephone number field for storing an associated phone number;

b) selecting a contact from the list of contacts;

c) receiving a soft call handling key activation for the selected contact
~~selecting an e-mail address with the call handling keys;~~

d) if the activated highlighted contact includes at least one associated e-mail address in the e-mail address field and at least one telephone number in the telephone number field, displaying contact details upon the short cut key activation;

e) if the activated contact includes at least one associated e-mail address in the e-mail address field and does not include a telephone number in the telephone number field, displaying a screen for composing an e-mail upon the short cut key activation, the selected at least one e-mail address entered into a recipient address field; and

f) if the activated contact includes at least one associated telephone number in the telephone number field and does not include an e-mail address in the e-mail address field, initiating a telephone call upon the short cut key activation.

~~e) — accessing a screen for composing an e-mail message, the selected e-mail address being entered into a recipient e-mail address field;~~

~~d) — composing the e-mail message; and~~

~~e) — activating the call handling keys to send the e-mail message to the e-mail address entered in the recipient address field.~~

45. (Currently amended) A mobile phone telecommunications device comprising:
a user interface including call handling keys, a scroll key, and soft keys;

a memory; and

a processor coupled to the memory and programmed with computer-executable instructions to perform the steps comprising:

a) accessing a list of contacts stored in the memory of the mobile phone, each contact in the list of contacts having at least one telephone number field for storing an associated telephone number;

b) selecting a contact from the list of contacts with the scroll key;

c) receiving a soft key activation for the selected contact;

d) upon activation of the soft key, displaying a screen to compose a text message; and

e) if the selected contact includes at least one telephone number in the associated telephone number field, automatically entering the telephone number into a recipient address field of the displayed compose text message screen.

~~e) — selecting a telephone number with the soft keys;~~

~~e) — accessing a screen for composing an e-mail message, the selected telephone number being entered into a recipient address field;~~

~~d) — composing the e-mail message; and~~

~~e) — sending the e-mail message.~~

46. (New) A method of claim 21 wherein the short cut key activation comprises activation of a soft key activation.

47. (New) A method of claim 21 wherein the short cut key activation comprises activation of a call handling key activation.

48. (New) A method of claim 23 wherein the short cut key activation comprises activation of a soft key activation.

49. (New) A method of claim 23 wherein the short cut key activation comprises activation of a call handling key activation.

50. (New) A method comprising:
- a) accessing a list of contacts stored in a memory of a mobile phone, each contact having at least one e-mail address;
 - b) selecting a contact from the list of contacts through a user interface;
 - c) highlighting an e-mail address of the selected contact with a scroll key;
 - d) receiving a key activation;
 - e) upon receipt of the key activation, displaying an e-mail template with an recipient field, the recipient address field automatically filled with the highlighted e-mail address of the selected contact.
